# SNMP* communication solution

The use of SNMP is now possible for Xtender systems and/or VarioTrack / VarioString via the SM2-MU 60 Solar Monitor server unit.

The SNMP V.3 uses strong encryption to prevent fraud and is widely used by local network operators, particularly in the field of telecom. Off the shelf compatible with different network monitors such as HP Open view, Nagios, Paessler PRTG, Castlerock SNMPc, The Dude (Mikrotik), etc.

Simple Network Management Protocol

In addition to SNMP, the SM2-MU 60 server also offers many other features such as datalogs and detailed display of the Xtender system, alarm generation (SMS, Email), extension module for GSM connection, datalog for external sensor information (current, energy, irradiation), or to drive actuators, etc.

More information on this product is available on the manufacturer's website: www.solarmonitor.cz
